<sup>b</sup> International HITRAN Institute

An adjacent poster (Part I) provides an overview of the HITRAN2012 database which was recently released [1]. In this poster, the details on some of the most important and drastic changes with respect to the previous edition of the database (HITRAN2008 [2]) will be given.

In particular, choices and the importance of new data for water vapor, carbon dioxide, molecular oxygen, methane, etc, will be explained and justified. The impact of the changes to remote sensing and planetary applications will be demonstrated, and future needs will be identified.

The HITRAN database is supported by the NASA Earth Observing System (EOS) under the grant NAG5-13524 and the Planetary Atmospheres program, under the grant NNX10AB94G.
